

Hadrian Park Trips & Visits

2025-2026

At Hadrian Park Primary School an exciting and vital aspect of our pupil's education is the purposeful link between our planned trips/visits/visitors and the school curriculum. We understand that education is more than just textbooks and classroom instruction. It's about inspiring curiosity, fostering understanding and nurturing a love for learning. This is where planned trips play an integral role.

At Hadrian Park, each year groups maps out curriculum linked encounters which allow pupils to engage with the curriculum in a dynamic and interactive way. Visit and visitor planning is an essential component of our curriculum, enhancing our pupil's cultural capital - the skills, knowledge and experiences that equip our children for success in life.

By visiting diverse places and engaging with different cultures and histories, pupils gain valuable insights and perspectives which enrich their worldview and prepare them to navigate our increasingly interconnected world with confidence and empathy.
